

## Tencel

This Suite Sleep pillow blends soft silky Tencel fibers with recycled polyester to create soft clusters that cradle your head while you sleep. Tencel is a manufactured fiber from sustainable Eucalyptus trees, using 20% less water than cotton. The fill is completely adjustable to your liking and the Tencel/ Poly knit cover features a zipper for easy fill removal. Tencel is a great fiber for sleep products because it is moisture wicking, breathable, and silky.

*Made by: Suite Sleep*

## Kapok

Kapok is a naturally silky fiber harvested from pods that grow on the Kapok tree. These trees grow in tropical climates close to the equator. This fiber is soft like down, yet contains none of the allergens. It is both moisture and dust mite resistant.

## Wool

Wool offers a soft and springy fill, and tends to sleep cooler and compact less than cotton fill. Like our other wool products, our organic wool pillows resist dust mites. Available in 3 weights: light, medium, and full. Wool will settle over time with the weight and heat of your head, but this will not change the support and comfort this pillow provides. Expect about 30% compression over time.

Made by: OMI, Holy Lamb

## Woolly Bolas

Woolly Bolas are little clusters of wool that provide an optimum fluff and density for a pillow. Our Woolly Bolas pillows feature an inner zippered case to adjust your wool fill as you wish. All covers and fill are machine washable.

Made by: Suite Sleep, Holy Lamb

## Wool and Buckwheat

This pillow has two chambers: the outside chamber, filled with organic wool, cushions both the feel and the sound of the organic buckwheat hulls located in the inner pocket. This pillow is made with a zipper, so sleepers can remove material and customize the fill to their personal preference.

Made by: OMI

## Alpaca Wool

Crescent Moon uses 100% natural, organically grown alpaca wool. Alpaca fiber is hollow, making it one of the warmest natural fibers available - and its porous nature

is naturally dry and clean which prevents dust mites and other allergens from settling in.

Made by: Crescent Moon

## Cotton

For those seeking a firmer, flatter pillow, our cotton pillows are filled with pure, sanitized 100% certified organic cotton. As with our wool pillows, they are available in 3 weights: light, medium, and full. Expect about 50% compression over time.

Made by: OMI, Naturepedic

## Down

Our Feathered Friends 700+ white goose down pillows are available in three different support levels: soft, medium, and firm, and feature an egyptian cotton cover. Perfect for traditionalists who like the soft feel of down.

Made by: Feathered Friends

## Latex

Our Molded and Contour pillows feature the same 100% natural latex you'll find in our mattresses. The Molded is recommended for back and side sleepers, the Contour is ideal for back or stomach sleepers.

Made by: OMI, Suite Sleep, Savvy Rest

## Shredded Latex

Our 100%-natural shredded rubber latex pillows have a soft yet supportive feel, and the fill is removable for easy adjustability. More fill can be purchased if needed. The covers are machine washable. This pillow is best suited for those wanting a squishy, malleable pillow.

Made by: OMI, Suite Sleep

## Wool Wrapped Latex

This best seller is made with a center chamber of 100%-natural shredded rubber latex surrounded by an outer chamber filled with organic wool. This pillow is made with a zipper, so sleepers can remove material and customize each pillow to their personal preference.

Made by: OMI, Holy Lamb

## K-Lex

Churchill and Smith founder Spencer Simcik set out to design the "perfect pillow," and the result is the highly malleable K-Lex (made from a blend of natural latex and kapok). The K-Lex is mold and dust mite resistant, and was designed to reduce pressure points while cradling the neck and head. This pillow is handmade in the USA and features a stretch organic cotton cover.

Made by: Churchill & Smith

## Oxygen Pillow

European Sleep Works designed the Oxygen Pillow specifically to aid airflow. It has a unique tri-layer construction featuring a hollow core, internal hinges and added depth around the edges. These features help to maintain proper spinal and neck support, open the airway for expanded lung capacity during sleep for easier breathing. The Oxygen Pillow works for both back and side sleeping.
